

AVG EMAIL SERVER EDITION 9.0

ESSENTIAL PROTECTION FOR YOUR EMAIL SERVER

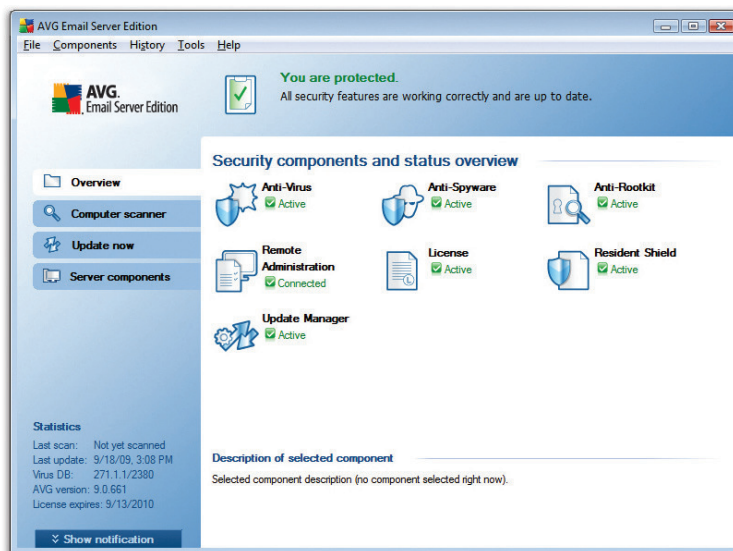

Award-winning anti-virus and anti-spyware protection for Windows mail servers to prevent viruses and other threats from spreading through your email system. If you already have virus protection on your network but don't have protection for the critical data traveling through, and stored on, your mail server, this is the solution for you. AVG Email Server Edition 9.0 also includes central anti-spam controls and key additional technology to protect your mail server against threats from unsafe websites.

- ✓ **NEW** high-performance virus scanner gives your mail system great protection without getting in the way of business – and certifies emails as virus-free
- ✓ **LinkScanner**® ensures critical data on your server is safe from malicious websites
- ✓ **ENHANCED** protection against phishing attacks prevents damage from clicking on unsafe links
- ✓ **NEW** centralized anti-spam controls for network-wide application of anti-spam policies
- ✓ **ENHANCED** remote administration ensures easy deployment and centralized management of security incidents
- ✓ **FREE** support and service around the clock and across the globe

AVG Email Server Edition 9.0 can be deployed in minutes. Central management and monitoring ensures that ongoing maintenance requires minimal resources:

- ✓ Centralized configuration, reporting and updating
- ✓ One-stop license management
- ✓ Remote installation and repair

AVG Email Server Edition 9.0 is priced according to the number of mailboxes - the number of licenses is determined by the total number of mailboxes on the mail server. One or two-year subscriptions are available.

80 million people trust us to keep them safe online – and so can you.

Here's how AVG Email Server Edition 9.0 protects your email infrastructure:
