

Adobe® Creative Suite® 5 Web Premium

Redefine the extraordinary in web design and development

Adobe Creative Suite 5 Web Premium combines full new versions of:

-  Adobe Dreamweaver CS5
-  Adobe Flash Catalyst CS5
-  Adobe Flash Professional CS5
-  Adobe Flash Builder 4
-  Adobe Photoshop CS5 Extended
-  Adobe Illustrator CS5
-  Adobe Acrobat® 9 Pro
-  Adobe Fireworks CS5
-  Adobe Contribute® CS5

Additional components:

-  Adobe Bridge CS5
-  Adobe Device Central CS5

Adobe Creative Suite 5 Web Premium software makes it easier to create standards-based websites and immersive digital experiences. With Adobe Dreamweaver® CS5 and the complete Adobe Flash® family of tools, you can design and develop content for delivery virtually anywhere.

Top reasons to upgrade to Adobe Creative Suite 5 Web Premium

NEW Integrated content management system support in Dreamweaver—Enjoy authoring and testing support for content management systems like WordPress, Joomla!, and Drupal. Dynamically Related Files provides direct access to a page's related files, even for dynamic pages, and Live View Navigation offers accurate previews of dynamic applications.

NEW Approachable interaction design with Adobe Flash Catalyst™—Transform static Adobe Photoshop®, Illustrator®, and Fireworks® artwork into interactive content with functional buttons, scroll bars, and more—without writing code. Roundtrip your artwork and perform edits in Photoshop or Illustrator at any time while preserving structure and interactivity.

NEW New text engine in Flash Professional—Create print-quality typography via the new Text Layout Framework in Flash Professional CS5. Work with columns and bidirectional text, and maintain layout and formatting with greater fidelity when importing from other Adobe products.

NEW Easy 3D extrusions with Adobe Repoussé—Quickly create stunning 3D artwork and apply rich material textures with Photoshop CS5 Extended. Take your designs even further by leveraging the Adobe 3D Forge engine for advanced editing of your 3D models.

NEW Crisp graphics for web and mobile devices—Deliver clean, sharp, pixel-aligned raster artwork with enhanced anti-aliasing features in Illustrator CS5. Avoid fuzzy graphics by automatically aligning artwork to the pixel grid, and control the appearance of individual text objects.

NEW Adobe CS Live online services integration—Get accurate browser-compatibility testing with BrowserLab, a new CS Live online service,* and manage design project reviews. CS Live online services are complimentary for a limited time—visit www.adobe.com/go/cs-live for details.

NEW Code Snippets panel in Flash Professional—Quickly include functional code for things like timeline navigation, actions, animation, audio and video, and event handlers. Reduce the ActionScript® 3.0 learning curve and enable greater creativity by injecting prebuilt code into projects.

NEW CSS inspection—Visually display the CSS box model in detail without reading code or requiring separate utilities. Hover your cursor over block-level elements in Live View to see their cascade and context, instead of using the Tag Selector.

NEW Adobe Flash Builder™ and Flash Catalyst integration—Open Flash Catalyst projects with Flash Builder, making it easy to add connections to a database or web services while preserving the visual intent and interactions defined by designers.

NEW Flash Builder and Flash Professional integration—Use Flash Builder as your primary ActionScript editor for Flash Professional projects. Streamline your workflow by testing, debugging, and publishing content in Flash Professional while editing code in Flash Builder.

*CS Live online services are complimentary for a limited time. See page 2 for details and limitations related to all Adobe online services.

System requirements

Windows*

- Intel® Pentium® 4 or AMD Athlon® 64 processor
- Microsoft® Windows XP with Service Pack 3; Windows Vista® Home Premium, Business, Ultimate, or Enterprise with Service Pack 1 (Service Pack 2 recommended); or Windows 7
- 1GB of RAM or more recommended
- 9.1GB of available hard-disk space for installation; additional free space required during installation (cannot install on removable flash-based storage devices)
- 1280x800 display (1280x1024 recommended) with qualified hardware-accelerated OpenGL graphics card, 16-bit color, and 256MB of VRAM
- Some GPU-accelerated features require graphics support for Shader Model 3.0 and OpenGL 2.0
- Some features in Adobe Bridge rely on a DirectX 9-capable graphics card with at least 64MB of VRAM
- DVD-ROM drive compatible with dual-layer DVDs
- Java™ Runtime Environment 1.6 (included)
- QuickTime 7.6.2 software required for multimedia features
- Adobe Flash Player 10 software required to export SWF files
- Broadband Internet connection required for online services*

Mac OS

- Multicore Intel processor
- Mac OS X v10.5.7 or v10.6
- 1GB of RAM or more recommended
- 11.2GB of available hard-disk space for installation; additional free space required during installation (cannot install on a volume that uses a case-sensitive file system or on removable flash-based storage devices)
- 1280x800 display (1280x1024 recommended) with qualified hardware-accelerated OpenGL graphics card, 16-bit color, and 256MB of VRAM
- Some GPU-accelerated features require graphics support for Shader Model 3.0 and OpenGL 2.0
- DVD-ROM drive compatible with dual-layer DVDs
- Java Runtime Environment 1.5 or 1.6
- QuickTime 7.6.2 software required for multimedia features
- Adobe Flash Player 10 software required to export SWF files
- Broadband Internet connection required for online services*
