

# CI-Mail-Policy set rules – get action

RULES and ACTIONS for Exchange (2000 / 2003 / 2007)

**Set rules for internal, incoming and outgoing** emails (e.g. add a disclaimer to emails).

CI -Mail-Policy enables you to check emails, add disclaimers or to inform users or user groups about non legal emails. Rules reacting to incoming or outgoing emails can be set with infinite options.

The software is very easy to configure. Disclaimers for external mails can be set. A disclaimer can also be set if the review to a certain content fails. It can also be ignored to a certain content.

## Use and advantages

- Central management of your emails
- Infinite options with various rules
- Central management of signatures
- Informs about rule violations
- Archiving emails according to legal registrations
- Fast and experienced support on your request

Pro Server:  
349,00 Euro, netto

## Samples:

- Add a Disclaimer to all Mails (also with user information)
- Plants automatically in the file system store and left
- Plants automatically with ZIP pack
- Outgoing Mails e.g. with CI-SIGN will have already kept a signature examined for certain contents. The signature is changed or is missing certain contents of (legal defaults) a Mail to the sender as well as the administrator is sent and a Disclaimer only then added
- Mails can be archived.
- All rules can be limited to groups, OU or user specific
- At internal Mails autosignatures can be removed
- Internal Mails can be examined for certain contents and configured with rules. From the notification of certain persons up to delete the email
- users may send emails only to certain users
- and many other functions

Test CI-Mail-Policy yourself! We provide a **free download of a testversion** (completely functional). Do you have more question or do you like more information? No problem. We will be pleased to help you! Contact us.
