Dr.Web anti-virus for Linux

| | | |
|--|---|---|
| With the highest rate of detection, Dr.Web scanner is guaranteed to quickly check autorun objects, removable data-storage devices, network and logical drives, e-mails, and files and directories including archived files. | ✓ | ✓ |
| SplDer Guard ensures constant resource-efficient monitoring of file operations. | ✓ | ✓ |
| Anti-spy blocks spyware, adware, riskware, paid dialers and joke programs. | ✓ | ✓ |
| Dr.Web Shield* tracks down viruses that use rootkit technologies to hide in a system. | ✓ | |
| Dr.Web anti-spam* detects spam and other unsolicited messages in any language with next-to-zero false positives. | ✓ | |
| SplDer Gate is an HTTP-monitor* that scans web pages in real time and blocks phishing web sites and other dangerous web resources. | ✓ | |
| The Dr.Web parental control* blocks access to web sites by key words or by their addresses and will protect your children from exposure to objectionable web content. Unique! You can restrict access to removable data-storage devices, files, and directories to prevent unauthorized access or deletion of important information. | ✓ | |
| New! Dr.Web Firewall* serves as an impenetrable barrier to intruders trying to enter your system. | ✓ | |

* – for Windows only
