

# PDFMailer

The new PDF standard for businesses

## **BUSINESS-PDF for businesses**

PDFMAILER offers the efficient creation of PDFs as required by businesses. PDFMAILER is robust, user-friendly and self-explanatory. Our skilled support staff will gladly assist you should any questions arise. You can reach the free support hotline at: +49(0)6392/995 150.

## **PDFMAILER is available in two versions**

1. PDFMAILER STANDARD. Users obtain the reliable PDF basic version: e.g. create, send, save, protect PDFs from any application via print job, consolidate PDFs from multiple applications as well as multiple print jobs into one PDF file and the support of the archiving standard PDF/A.
2. PDFMAILER PROFESSIONAL is the extended version valued by businesses. It is characterised by functions required in daily business. For instance a company letterhead can be added when printing. Ideal for any business mail which is to be sent via PDF-Mail.

PDFMAILER PROFESSIONAL offers editing advantages for the printing and automatic distribution of multiple PDF files. Recipient addresses, email body texts and subject headings can be added from the printing application. This allows for an efficient distribution without user interaction. In addition, this PDFMAILER supports the PC supported postage printing "STAMPIT" from the DEUTSCHE POST.

## **Operating philosophy and visual appearance of PDFMAILER.**

The preview displays the print results clearly. All applicable options can be selected and started in the sidebar. As an option, the PROFESSIONAL version can be remotely operated without using the user interface.

Zoom 1. Functional range PROFESSIONAL with stationery

Zoom 2. Incl. output management and STAMPIT

## The advantages of PDFMAILER

- **Minimal training effort** - Easily usable product with plausible operating philosophy. Free support service
- **Autopilot** - API and scripting for simplifying the distribution and filing process.
- **Business PDF** - Stationery within the PDF - All logos are added during printing.
- **Control of printers** - Output management and printer control, PC supported postage printing via STAMPIT.
- **Functional range** - Includes the complete functional range of the "STANDARD" version

## What PDFMAILER STANDARD has to offer

- **Format support** - All important formats. In addition to PDF also PDF/A (the current archiving standard) as well as the formats TIFF and JPEG.
- **Functionality** - All vital PDF functions: encryption, protection, consolidation, saving, sending, printing and much more.
