How our product protects you

The optimized combination of proactive, behavioral and in-the-cloud technologies even prevents as yet unknown malware from harming your system.

Smart anti-phishing protection and a virtual keyboard keep your digital identity absolutely secure, while with Safe Surf you'll never be exposed to harmful or offensive websites.

The product's advanced Parental Control features can block, limit and log applications and web access, so your children stay safe online and offline.

Safe Run mode allows suspicious applications and websites to run in a specially isolated environment where they cannot damage your system.

Application Control restricts programs' rights and access to system resources based on whether a program is rated as safe, unknown or dangerous.

The bootable CD inside this box will help you to disinfect your system should you ever need to.

Award-winning technologies in Kaspersky Internet Security 2011 protect you from a wide range of IT threats:

- Viruses, Trojans, worms and other malware, spyware and adware
- Rootkits, bootkits and other complex threats
- Identity theft by keyloggers
- Botnets and various illegal methods of hijacking your PC
- Zero-day attacks and unknown threats
- Drive-by download infections

During the license period you are entitled to the following free services:

- Automatic antivirus database updates
- Program updates and upgrades to new versions

The product includes all the features and technologies of Kaspersky Anti-Virus 2011.
