

Mindjet Catalyst™ complements MindManager with online document storage and convenient web-based mapping.

How it works:

Catalyst is an online service that provides anytime, anywhere access to maps and other documents so you always have the information you need. Access Catalyst directly from MindManager or through any web browser.

Create and Edit Maps Anytime, Anywhere

- Work seamlessly by accessing Catalyst online document storage directly from MindManager for Windows.
- Whether you're at the office, at home or on the road, access your maps and documents from any web browser.

Enhance Project Efficiency

- Organize, manage and communicate project plans using central online workspaces to share essential documents and update project status.
- Easily manage multiple projects by assigning workspace permission levels on a project-by-project basis.

Expand Your Options for Communicating Visually

- Conveniently communicate and collaborate in real time using visual maps to show the big picture and all the relevant details.
- Use real-time mapping sessions to brainstorm ideas, clarify concepts and gain essential input before composing a formal presentation.

TOP FEATURES

Secure Online Repository

Easily store and access maps and related documents online, directly from MindManager or via any web browser. Use Catalyst to ensure anytime, anywhere access to your work, to share maps and related documents, or simply to back up important information.

TOP FEATURES (CONTINUED)

Shared Workspaces

Organize and store maps and related documents into project-specific workspaces to keep all team members up to date on project status and relevant information. You can identify separate access rights for each workspace, as well as individual permissions (read, write, manage) to control information sharing.

Account Access Management

Easily invite other users to join your Catalyst account so they can access stored maps and other documents. You can invite anyone to join your account, based on the limits of your license agreement, whether or not they use MindManager.

Interactive Presentations

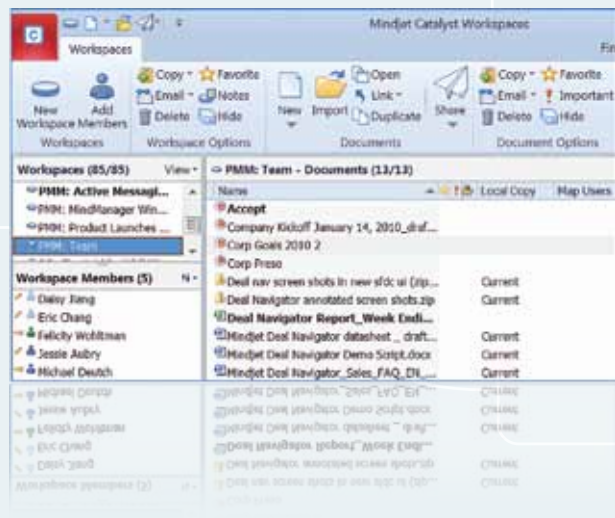

Use interactive maps to present the big picture and the right level of detail for each audience. Using Catalyst, you can present and enter feedback at the same time.

Web-based Visual Mapping

Create and edit maps online and enable colleagues to do the same by adding them to your Catalyst account. Capture content and add context by adding hyperlinks, attachments, notes and images. Organize your thoughts using Catalyst, then easily export map content to Microsoft Word® or PowerPoint®. Users don't need to have MindManager in order to create and edit maps using Catalyst.

Map Co-editing

Brainstorm, develop presentations or refine proposals by co-editing maps with colleagues in real time. Catalyst's simultaneous mapping capability makes collaborating with team members more efficient.

SYSTEM REQUIREMENTS

For Online Mapping, Document Storage and Sharing

The following supported browsers with Adobe® Flash® Player 9 or above:

- Microsoft® Internet Explorer® 7.0 or greater
- Mozilla® Firefox® 3.0 or greater
