

FAX

Email  
Email

Corporations in the health, legal, financial services, logistics or transportation sectors receive a big number of faxes everyday. As with all company, any of these received faxes can be crucial for their business.

**Fax@Mail 10** is the optimal solution for small business where receiving faxes is an important factor of the daily work-flow: pharmacies, lawyer offices, small logistics and transportation companies, health organizations, individual specialists and consultants within legal and financial services.

Mainly with a single ISDN card and with Fax@Mail, any company can receive faxes by email (even when fax machines are down and need maintenance), tag these faxes, store them in widely used electronic documents systems (ex: SharePoint) and assure an automatic back-up. **Fax@Mail 10** brings these basic, yet important services even further: multiple ISDN channels, runs as a service, better graphic evaluation, supports virtual environments advanced integrations – Exchange, SharePoint, Active Directory.

## Why Visendo fax@Mail 10

**Flexible fax to email application:** receive your faxes directly in your inbox while being able to connect to manage these faxes with your current applications.

**Advanced technical support:** up to 24 months free support.

**Fast and easy to install and configure:** install and configure fax@Mail 10 in less than 10 minutes
