

Visendo Fax Server is the flexible, innovative and dynamic fax software for both SMBs and corporations

Visendo Fax Server comes in three editions, each of these product variations bringing value to different business sizes

Fax Server Express

This is mainly used by individual professionals with low fax sending/receiving daily activity (less than 15 managed faxes/day).

Fax Server Express provides the exact feature that a professional needs to make its daily activity dynamic.

Fax Server Standard is used by small and medium companies with a relatively large flow of incoming and outgoing faxes.

It can be provided with 10 licenses and 10 MSN clients and brings even more features than Visendo Fax Server Express.

Fax Server Enterprise is the ultimate Fax Server application for corporations. It is highly customizable depending on the number of needed licenses, lines and clients. The key-word for this version is "U N L I M I T E D", as it can be personalized for, virtually, any type of organization.

.. green, fast and secure
