

POP3 Collector

The new Visendo popConnect 10 solves all the major problems that common POP3 connectors have

Visendo popConnect 10 is a native POP3 Connector with extended capabilities: attachment control and filtering, keyword filtering, automatic blacklisting and different ways to manage your alerts and log reporting.

Visendo popConnect 10 is widely used by small and medium companies all around the world and ensures them time savings and security where other applications fail.

Visendo popConnect 10 includes a powerful spam blocker, spam filter, black list processing, and new features, which use a wide variety of local and network tests to identify spam signatures to make it harder for spammers. It supports mailing lists, remote access and administration, spam-blocking, content filtering, attachment filtering and multiple domain support.

POP3/IMAP Connector—collects emails via POP3 protocol from multiple accounts and supports multiple SMTP servers

Anti-Spam Features—based on keyword filtering, header checking, attachment extracting

popConnect 10 FEATURES

- Filtering: anti-SPAM, anti-VIRUS plug-ins, keywords filtering
- Attachment extracting, header check, blacklisting
- Postmaster notifications, RSS (email forwarder), SSL support
- Rule engine (distribution), integrated scheduler, logging
