Runs without installation - no administrator rights needed	USB-Version	USB-Version	USB-Version
Usable on different PCs again and again (although not parallel)	USB-Version	USB-Version	USB-Version

### prices (MSRP)

#### Download

The software can be downloaded from our website and we mail the keycodes.

#### Box

The software will be delivered in a DVD-Box with CD, little handbook and keycode.

#### USB-Version

You receive a USB-Dongle (also usable as a regular USB-Stick: 1 GB) with a special installed smartprojecting software. The software works directly from the Stick and does not need to be installed on the PC (you do not need to have administrator rights). Once you have purchased a license you can use the stick on different PCs (not parallel) as long and as often as you like.
