

Zend Studio 5

The most complete development solution for PHP

Zend Studio 5 is the standard in PHP development and testing with the most comprehensive set of development tools for creating highly reliable applications as required for the Enterprise. It ensures best practices in software development by combining the leading IDE for PHP with a testing environment that speeds quality assurance, integration, and staging processes. Only Zend Studio 5 gives you everything you need to build, test, and deliver high performance PHP applications.

Features at a glance

- Leading PHP IDE
- Rapid code development and deployment
- QA/Testing Tools
- Local and remote debugger
- Database connectivity and SQL tools
- Team collaboration environment
- CVS and Subversion support
- Full PHP 4/PHP 5 switching
- PHPDocs/PHPDocumentor support
- SFTP, FTP over SSL for secure connections
- 100+ code snippets
- Zend Framework Integration
- Web Services support (SOAP)
- Staging Platform
- PHP/Java Bridge
- Performance API
- Integration with Zend Platform™

Product highlights

Zend Studio 5 is designed for a wide range of developers and comes in two editions: Standard and Professional. Conceived to create highly reliable applications, Zend Studio 5 delivers unmatched ease-of-use, scalability, reliability, and the extensibility that professional and enterprise developers require to develop, deploy, debug and manage business-critical PHP applications.

The most powerful development environment for PHP

- Easily integrate Java into your code using the Code Completion features and define/specify additional Jars or Class folders that can be used for code completion
- Seamlessly use integrated and customizable Zend Framework code completion and view the Framework functions list from the PHP Functions View
- View Zend Platform Events in a dedicated and a customized Events List window. Click on each event to view complete event details in the browser window
- Increase productivity with: Full PHP 5 Support, Code Analyzer, Code Folding, Code Completion, Syntax Highlighting, Project Manager, Code Editor, Graphical Debugger and Wizards
- Easily document your code, applications, and projects with PHPDocumentor, the standard documentation tool for PHP
- Simplify deployment with FTP and SFTP integration, allowing developers to securely upload and download project files transparently to and from remote servers

Superior business application development

- Connect directly to the most widely used professional databases such as IBM DB2/ Cloudscape/Derby, MySQL, Oracle, Microsoft SQL Server, PostgreSQL, and SQLite
- Write and execute queries on connected servers using Zend SQL Query Editor with SQL92 and syntax highlighting support
- View database structures and manage content with Zend SQL Explorer

Complete debugging environment for PHP

- Leverage advanced debugging features, including: Conditional Breakpoints, Stack Trace View, Advanced Watches, Variables and Output Buffer
- Debug locally or remotely on the native environment using the most powerful PHP debugger
- Ensure maximum protection for offsite locations or across the Internet with secure remote debugging
- Debug and profile your code directly from the new IE browser with 'one-click browser debugging'

Robust team development and testing tools

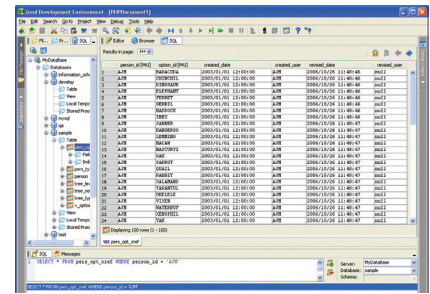

- Facilitate team development and collaboration by effectively managing your source code using CVS or Subversion directly from within Zend Studio
- Get immediate feedback on code and script performance when using Zend Studio 5 QA/ Testing tools
- Deliver highly reliable applications using PHP Intelligence tools that help you address your application weaknesses before they appear in production

The PHP Company

Zend Studio 5: Feature Comparison

High Level Features	Std.	Pro.
Professional IDE w/Editor, Debugger, and Help	✓	✓
Windows, Linux, Mac versions	✓	✓
Multi Language support	✓	✓
Professional Editor	✓	✓
Syntax highlighting for PHP, HTML, XHTML, and JavaScript	✓	✓
Syntax highlighting for XML & CSS	✓	✓
Code Templates	✓	✓
Code Folding	✓	✓
Support PHP 4 and PHP 5	✓	✓
Advanced Code completion	✓	✓
PHP Code (+PHPDoc) Analysis	✓	✓
Professional Internal Debugger	✓	✓
Code snippets	✓	✓
Zend Framework Integration	✓	✓
Embedded Java Code Completion	✓	✓
Remote Debugger & Debug URL		✓
Remote Profiler		✓
Database Connectivity & Integration for: IBM DB2/Cloudscape/ Derby, MySQL, Oracle Microsoft SQL Server, SQLite, and PostgreSQL		✓
Set of SQL tools: SQL Query Editor, SQL Explorer, and more...		✓
PHPDocumentor		✓
CVS integration for team development		✓
Subversion Integration		✓
FTP Support		✓
Web Services Support (SOAP)		✓
Scripts errors & Performance bottlenecks reports		✓
Alert rules		✓
XML Integration		✓
QA/Testing Solution		✓
Staging Platform		✓
Centralized Management Console		✓

System Requirements

For the current System Requirements, visit:
www.zend.com/studio

Zend Studio Client

Supported Operating Systems, Platforms and OS versions:

- Windows x86 2000, XP, 2003
- Linux x86
- Linux x86-64
- Mac OS X Power and Intel 10.4

Supports all PHP versions

Zend Platform For Server Features

Supported Operating Systems, Platforms and OS versions:

Zend Platform for Production & Development:

- Linux x86
- Linux x86-64
- Solaris Sparc 8, 9, 10
- Solaris x86 9, 10
- FreeBSD x86 5.4, 5.5, 6
- Mac OS X Power

Zend Platform for Development only:

- Windows x86 2000, XP, 2003

Supported Web Servers:

- Apache 1.3.x
- Apache 2.0.x (compiled in prefork mode only!)
- Apache 2.2.x (compiled in prefork mode only!)
- IIS 5, 6

Supported Browsers:

- MS Internet Explorer 5.5 and above
- Netscape 7 and above
- Mozilla 1.7 and above
- Firefox
- Safari

PHP Compatibility:

Zend Platform full feature set:

- 4.3.9 and above, 4.4.x, 5.x

Zend Studio Debug only:

- 4.2.x, 4.3.x, 4.4.x, 5.x

Zend: A complete solution to your PHP needs

- **Zend Platform** – Performance, Management, Integration & Enterprise Scalability
- **Zend Core** – Reliable PHP Made Easy
- **Zend Guard** – Protect your Code and IP
- **Zend Consulting** – PHP Certification and Education
- **Zend Training** – Formations et certification PHP
