

What open ports does the solution need?

Open Ports

To run a working ForeNova solution, please be aware to have some ports open between the NovaSensor and the NovaCommand

Port	Protocol	Used	Reason
443	TCP	For web access to NovaCommand	User login to NovaCommand
443	TCP	For web access to NovaSensor	User login to NovaSensor
443	TCP	Between NovaSensor and NovaCommand	Communication and updates between NovaCommand and NovaSensor
4430	TCP	Between NovaSensor and NovaCommand	Sending metadata and logfiles from NovaSensor to NovaCommand
4488	TCP	Between NovaSensor and NovaCommand	Sending metadata and logfiles from NovaSensor to NovaCommand

Please be aware that if the NovaCommand is on a different network or in cloud you need to allow the ports to be used by the NovaSensor in your firewall.

THANK YOU!
