TFORMer

Compliance Labeling

Industry Forms

Print Industry Compliance Labels and Forms within Seconds

Create Your Personal Layouts or benefit from Ready-To-Use Labels and Forms

Ahead of Schedule

All industrial sectors put their focus on optimized supply chains. For that purpose the use of standardized forms and labels is a must. To support a smooth information exchange often barcodes are used for these documents.

With *TFORMer* you benefit from a barcode-enabled software solution which harmonizes and simplifies printing such documents.

With Ready-to-use Document Templates

TFORMer offers numerous ready-to-use templates from within the areas automotive, logistics and transportation. Time consuming design efforts are eliminated completely. Furthermore it is ensured that the documents comply with the appropriate standards.

Pre-defined forms are available for AIAG, Galia, GM, GTL, Odette, VDA, VDA BELOM, DHL, FedEx, Postal Services, TNT, UPS, European Customs und GS1 logistic labels (tracking & tracing).

Or Create Your Own Layouts

On demand, you can create arbitrary layouts for forms, reports, labels, vouchers and serial letters by yourself. Take advantage of the powerful layout features of *TFORMer Designer*. The intuitive user interface reduces the design efforts significantly.

Provide Data

Variable data within a form layout is utilized by means of data fields. These data fields can be used for text elements, barcodes, for images, for controlling the output behavior and for computations.

Variable data is provided either manually or with the help of external data sources like XML, text or CSV-files (e.g. as exported by Microsoft® Excel®) and ODBC databases.

Print the Forms

TFORMer works with all printers available on Microsoft® Windows®. Special-purpose barcode printers or other costly extensions are not required. In addition, output may be exported as PDF, PostScript, Image, ZPL-II or HTML file.

Helpful Tools

Various free tools and sample applications facilitate manual data entry and document printing.

Besides this, you have all options to integrate *TFORMer* in automated processes: the output functionality of *TFORMer* is available to software developers or administrators without any restrictions.

Highlights

Standardized Forms
- No Design Efforts
- Ready-to-use Industry Forms
- Pre-designed Logistic Labels
- Integrated Barcodes (Linear, 2D, Composite)
- File Import
- Database Import
- Preview with Live Data
- Perfect Output Quality

Self-created Documents
- Grafical Layout-Editor
- UNICODE Support
  Supports Asian and Eastern European Fonts
- Intuitive User Interface
  No Programming
- Direct Printing
- Export as PDF, PostScript, HTML, Image, ZPL-II
